PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience specializing in **frontend** and **mobile** development, with expanding backend development in **Node.js**. Proven track record of building production-grade interfaces across agritech, fitness, telecom, and recruitment. Specialized in React, React Native, and TypeScript from pixel-perfect landing pages and complex data dashboards to cross-platform mobile apps shipped on both stores. Proven track record of owning entire frontend slices end-to-end, from architecture to deployment.

WORK EXPERIENCE

Frontend Software Engineer, Kraftbase, Vadodara

DEC 2025 – MAY 2026

- Optimized landing page performance and load times by refactoring GSAP animation sequences and implementing a critical CSS delivery strategy.
- Engineered an AI-driven EEG dashboard using React and Tailwind to visualize real-time neurological data streams, reducing event detection latency through custom TypeScript components.
- Implemented Stripe-based dispute resolution workflows and a real-time transaction UI with optimistic state updates to improve user experience.

Frontend Engineer, Mera Farmhouse, Chandigarh

SEP 2024 – JULY 2025

- Accelerated cross-platform feature delivery by architecting a shared component library between Next.js and React Native for an international agricultural marketplace.
- Maintained consistent production release cadences across multiple deployments for both iOS and Android applications.

Software Developer (Front End), Team Geek Solutions, Pune

OCT 2021 – JULY 2024

- Architected an automated interview management system that streamlined administrative workflows through custom API integrations.
- Designed a centralized Storybook component library integrated across three separate platforms, ensuring UI architectural consistency and expediting new developer ramp-up periods.
- Enhanced frontend performance and system stability by implementing React Query for standardized data fetching and intelligent caching across multiple production environments.

SKILLS

Languages: JavaScript, TypeScript

Technologies: React.js, Next.js, React Native, Node.js, Zustand, React Query, Redux Toolkit, Tailwind CSS, MUI, Framer, Vitest, Jest

PROJECTS

Open Source Developer, RSVP (rsvp.kim)

- Reduced location search latency by 60% by replacing static menus with an API-driven autocomplete system.
- Established unit testing infrastructure to enforce architectural consistency and long-term codebase maintainability.

EDUCATION

BA, Eng hons, Magadh University

2017 – 2020
